ACKNOWLEDGEMENT OF COUNTRY

Sentis acknowledges the traditional custodians throughout Australia and recognises their connections to land, waters and community.

We acknowledge the Traditional Owners of the land on which we meet today and pay our respects to elders past and present. We extend that respect to Aboriginal and Torres Strait Islander peoples here today. We do this because we value Aboriginal and Torres Strait Islander history, culture and knowledge.

Our Mission: To change the lives of individuals and organisations for the better, every day

What coaching 15 (and what it's NOT)

What coaching 15...

- A development-focused, growth-oriented process
- Built on self-reflection, ownership and learning
- A partnership that helps individuals set goals, improve performance, and thrive

What coaching is **NOT**...

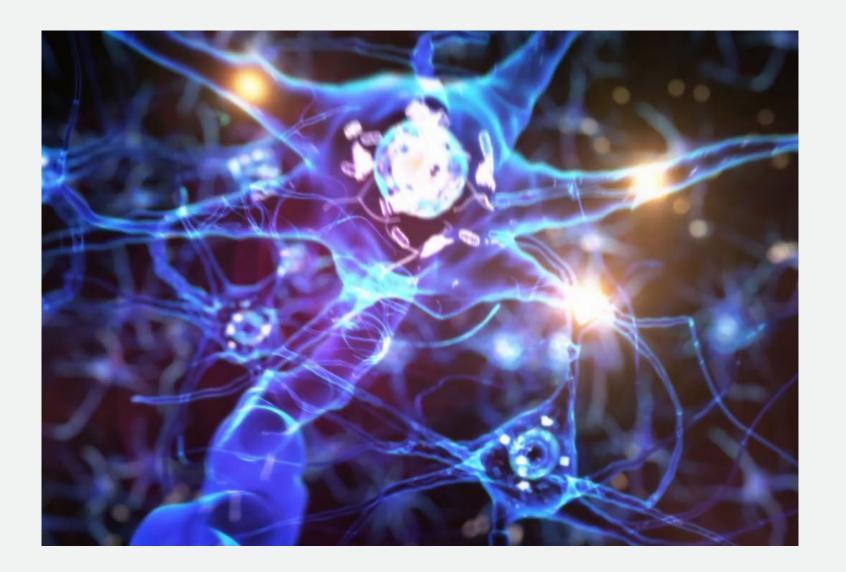

- Therapy
- Hand holding
- Policing or performance management
- Punishing or reprimanding
- Stepping in to do the job

Neuroscience of coaching

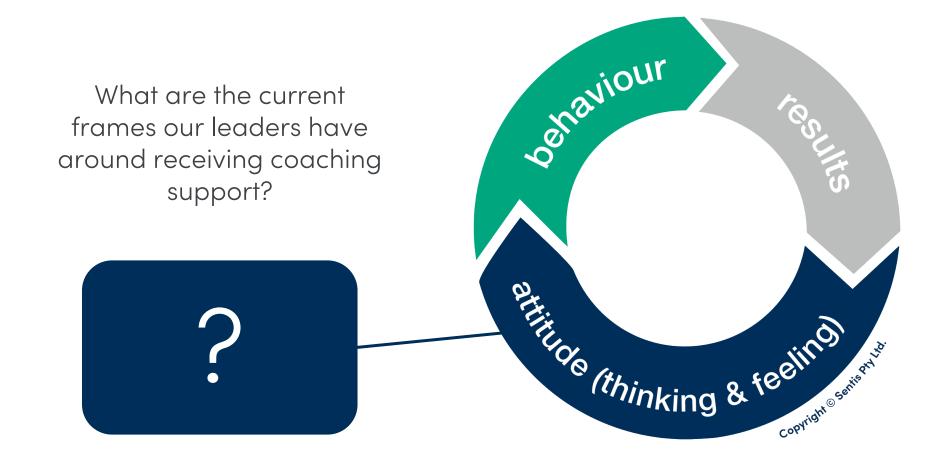

Coaching engages the brain's problem-solving and goal-setting regions.

It enables behaviour change through insight, not instruction.

sentis

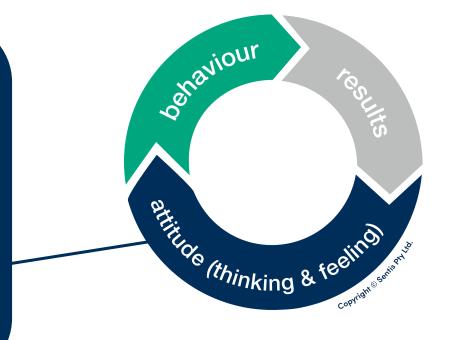

Roadblocks to success?

Helpful attitudes required for effective coaching

- ✓ Coaching develops our people
- ✓ Coaching helps us to understand the realities our people face
- ✓ Coaching provides the opportunity to learn from each other
- Coaching provides the opportunity to show visible leadership

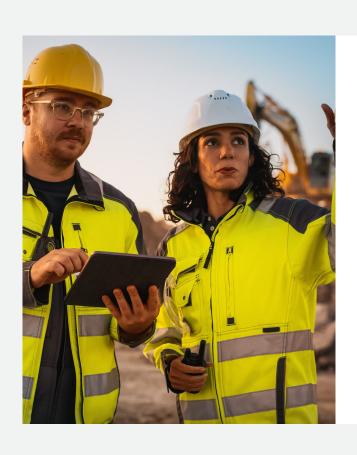

How can you overcome the misconceptions or resistance to coaching?

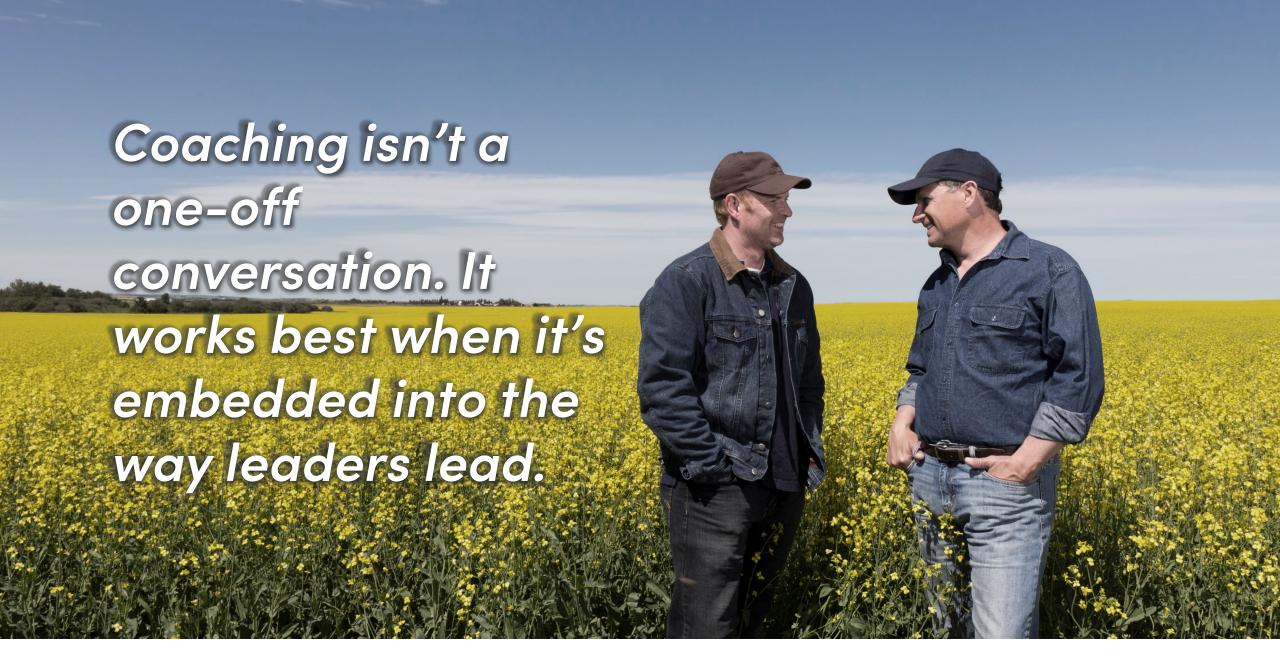

A psychologically safe process

PACING OUT OBJECTIONS:

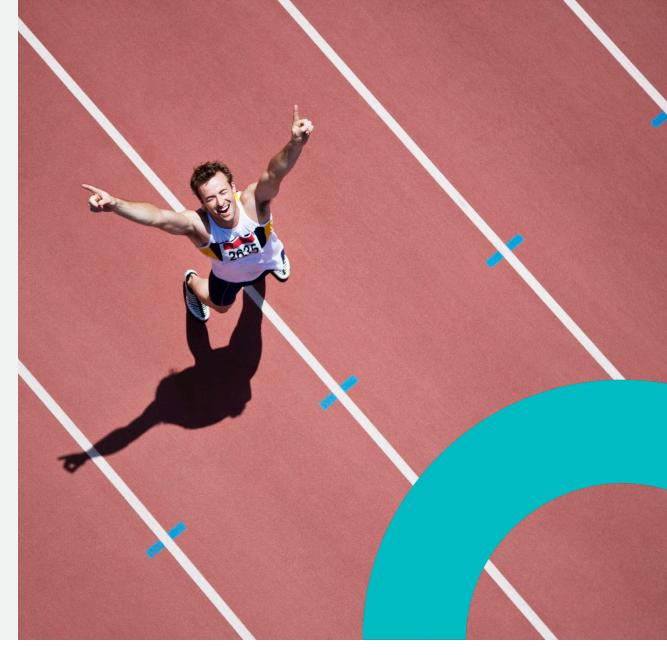

- "Not here to catch you out"
- "We want to improve as a business overall, not performance manage"
- "This is a learning opportunity and an opportunity to develop our people"
- "Feedback goes both ways"

Setting your coaching strategy up for success

Keys to success

- Create psychological safety first
- Communicate the purpose and value of coaching
- Coach regularly, not just during problems
- Equip leaders with a simple coaching framework
- Model it from the top leaders need to be coachable too

sentis

What steps did you take to set your coaching strategy up for success?

Where can coaching be useful?

Coaching is a critical skill in safety

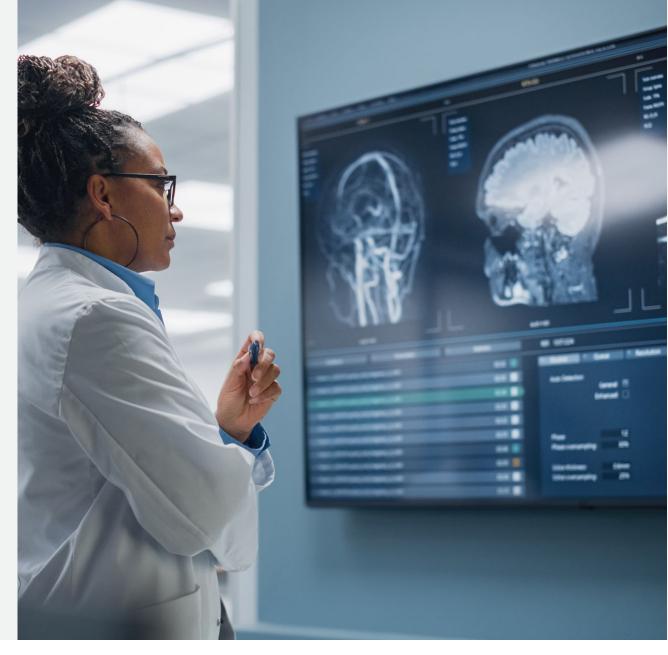

- Safety interactions & field conversations shift from checking to coaching
- Giving feedback coaching helps deliver feedback that lands and sticks
- Post-training embedding use coaching to turn training into habit
- Upskilling staff quickly build capability through guided learning
- Learning teams guide discovery and insight instead of directing
- General leadership capability uplift build confident, curious leaders who empower others to think and grow.

Neuroscience link

Regardless of where or how you apply it, coaching positively shapes how people think, communicate, and perform at work.

It activates reflection, insight, and intrinsic motivation — all vital for high-performing, psychologically safe teams.

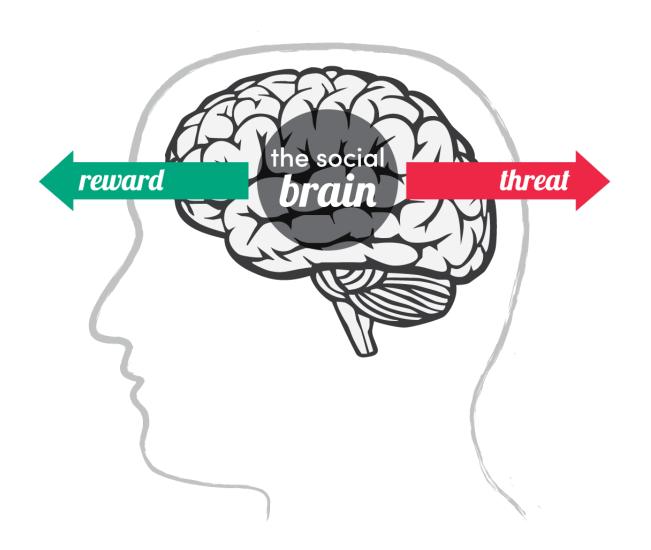

sentis

What contexts have you used coaching in?

What does it take to be a good coach?

Coaching with the brain in mind

Coaching from an adult leader frame

- Provide direction and certainty
- Seek to understand
- Prompt reflection and insight
- Invite input and feedback
- Advise and educate where appropriate

The high-performance formula

How can we frame constructive feedback in a way that drives 40% more effort to improve?

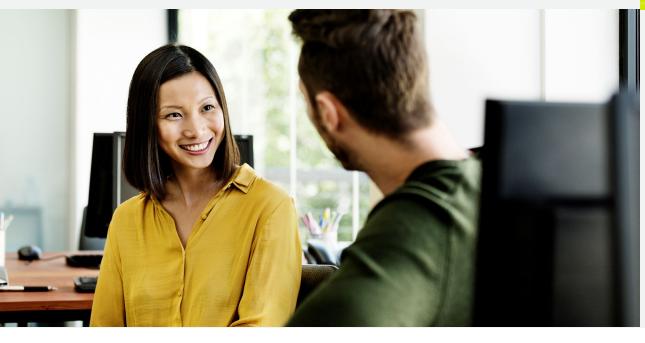

"I'm giving you this constructive feedback because I have very high expectations, and I know that you can reach them".

High expectations + demonstrated belief in their ability = high performance

sentis

Humble Inquiry: Asking instead of telling

Humble inquiry is used as an approach in coaching to gain information that you do not already know the answer to, through questions.

The approach enables a coach to draw someone out and build a relationship that is based on curiosity and interest in the other person.

Why is it important to 'ask' instead of 'tell'?

sentis

Coaching questions: great VS not so great

- Accusatory, 'why' questions:
- Leading questions
- Closed questions
- Stacked questions
- Questions based on assumption

- Curious, neutral questions
- Questions to understand the other's perspective
- Asking permission
- Questions that empower action
- Questions that encourage collaboration

What have you seen as the most important traits or habits of great coaches in your team?

What are the outcomes of coaching?

Key outcomes of investing in coaching

The outcomes of coaching

"Overall, based on three meta-analyses (representing thousands of data points) it is safe to conclude that coaching is an effective workplace intervention".

Workplace coaching has experienced a dramatic rise in popularity over the past decade and is one of the fastest growing performance-enhancing interventions used by modern organizations. Yet, despite its popularity, workplace coaching has not been the subject of much empirical research and a true science of coaching has yet to be developed. The purpose of this research was to update prior meta-analyzes that investigated the impact of coaching on organizational outcomes and to provide recommendations for how the field needs to evolve. Results indicated that, consistent with prior meta-analyzes, workplace coaching is effective in achieving positive organizational outcomes. The effects of several moderators were also investigated. Finally, we discuss the results in terms of recommendations for future directions that we believe will establish and advance the science of coaching.

KEYWORDS

workplace coaching, executive coaching, coaching, leadership development, coaching effectiveness

1. Introduction

Coaching has experienced a dramatic increase in interest and use in the past several years. In fact, coaching has been described as one of the fastest-growing specialties within the Human Resources profession (Bozer and Delegach, 2019). The International Coaching Federation (ICF) reported that there were more than 71,000 coaching professionals in 2019 (International Coaching Federation, 2020), a number that has more than tripled in the past 10 or so years (Theeboom et al., 2014). Indeed, coaching in the workplace has been so well accepted that many organizations provide it as part of a benefit package to their most valued employees. The ICF estimates that over two billion US dollars per year is invested in workplace coaching worldwide (International Coaching Federation (ICF), 2020).

As coaching has increased in acceptance, it has also evolved to meet the demands of its clients. Coaches are much more likely to have received formal training now than in the past (Passmore and Sinclair, 2020). There are also an increased number of assessment techniques (MoGeller and Kotte, 2022) and interventions (Greif et al., 2022) available to today's coaches. Additionally, the COVID pandemic accelerated the shift in the delivery modality of coaching.
